

Luis Giovanni Guerrero Garcia

Data Science Sr Manager Vice President

✉ lgiovanni.guerrero@gmail.com ☎ +52 5574964416 📍 Naucalpan, Mexico

📄 Luis Giovanni Guerrero Garcia

PROFILE

Award-winning Senior Data Science Manager with over 8 years of experience spearheading **digital transformation** through high-impact **Machine Learning** and **Predictive Analytics** solutions. **Generated over \$38M in revenue** by architecting **end-to-end ML systems** for price optimization and customer lifecycle management. Expertise in leading **cross-functional teams** and implementing **MLOps** practices to drive **data-driven decision-making**. Seeking to leverage extensive leadership and technical skills in a new environment to tackle challenges with innovative methodologies like **Metalearning AI**

EDUCATION

Instituto Tecnologico Autonomo de Mexico, 08/2018 – 04/2018
Diploma Data Science & Big Data

Universidad Nacional Autonoma de Mexico, 08/2012 – 12/2016
B.S. in Applied Mathematics and Computing

PROFESSIONAL EXPERIENCE

Banamex, Data Science Sr Manager Vice President 09/2022 – Present

- **Next-Generation Credit Scoring:** Led the development and deployment of a novel credit card scoring model, increasing approval rates by 7% and expanding financial inclusion for youth banking. Awarded the **AI Financial Innovation Award by Global Finance Magazine (2024)**.
- **Product Launches & Revenue Growth:** Architected the machine learning model for a new payroll loan product, driving 400,000 incremental offers and generating \$21M USD per campaign.
- **Team Leadership & Strategy:** Managed a high-performance team of 10+ data scientists and engineers, aligning data science projects with key business objectives, ensuring successful end-to-end delivery and high model accuracy.

Banamex, Data Science 08/2017 – 08/2022

- **Price & Revenue Optimization:** Designed and implemented ML models for pricing optimization on installment products and credit cards, generating over **\$17M USD in incremental revenue**.
- **Data-Driven Strategy:** Orchestrated price sensitivity testing to quantify the P&L impact of interest rate changes, **a strategy that boosted total revenue by over 16%** and provided senior leadership with a clear framework for data-driven decisions.
- **Advanced Modeling & Customer Value:** Architected a **proprietary credit card scoring model** by engineering synthetic variables from internal and credit bureau data, resulting in a **~10% increase in the reserve rate**. Developed Net Present Value (NPV) models to assess campaign profitability and optimize credit line allocation.

Ballhausen Ingenieria, Applied research developer 01/2017 – 07/2017

- **Led the development of a micro-seismic analysis system** by applying computational geometry and statistical models to interpret fracture data, improving operational safety and efficiency.
- **Engineered a high-performance data ingestion module** in ANSI C to replace the legacy DLIS parser, establishing a foundation for near real-time analytics.

SKILLS

Programming & ML — Python (Pandas, NumPy, Scikit-learn, PySpark), SQL (PostgreSQL, BigQuery), Git, GitHub, **Data & Analytics** — Machine Learning, Predictive Modeling, Price Optimization, Credit Scoring, A/B Testing, Statistical Analysis, Power BI, Excel, **Tools & Platforms** — Hadoop, BigQuery, GitHub Copilot, **Professional** — Leadership & Team Mentoring, Agile Methodologies, Cross-Functional Collaboration, Strategic Planning, Project Management, Data-Driven Decision Making

AWARDS

"30 Young Promises of Finance 2025" 🏆

Recognized for leadership and innovation through prestigious accolades.

Medalla Gabino Barreda

Awarded for achieving the highest GPA in my Bachelor's degree
